

Requirements of the Online Bookstore:

We require to develop an information management system that supports some of the services involved in an Online Bookstore (e.g., Amazon.com). The Book store has registered customers in order to sell books. It also contains publishers information and a customer can place the book he desires to buy on a shopping basket.

- ☐ A customer has an email, name, phone and address.
- ☐ A book has an ISBN, year, title and price.
- ☐ Publisher has a name, address, phone and url and publishes several books, but one book can be published by one publisher.
- ☐ An author has a name and address and can write several books.
- ☐ Books can be written by only one author and they are stored on many warehouses and one warehouse has many books.
- ☐ A customer can have several shopping baskets

Each shopping basket belongs to one customer, where each shopping basket can contain several books.
